PROFILE

Technology executive with 20+ years of experience leading software, AI-driven platforms and digital transformation initiatives across cloud, IoT and embedded systems.

Proven track record in building and leading engineering teams, defining technology strategy and delivering complex platforms aligned with business goals.

Founder and CTO with hands-on expertise in Generative AI, Machine Learning and scalable data platforms, including RAG-based systems and AI-enabled products.

Experienced in organizational redesign, platform evolution and cross-functional leadership in complex, innovation-driven environments.

Currently targeting senior international roles as CTO, Head of Engineering, Head of AI or Digital Transformation Leader.

CORE EXPERTISE

- Generative AI & LLM Systems (RAG, AI-driven platforms)
- Digital Transformation & Technology Strategy
- Scalable Cloud Architectures & Microservices
- Data Platforms & Analytics Pipelines
- IoT & Embedded Systems
- Product & Platform Development
- Engineering Leadership & Team Development
- Business & Stakeholder Alignment
- Organizational Transformation

WORK EXPERIENCE

CTO & Founder | AI Product & Platform Lead

07/2022 – 06/2025

Deep-tech startup focused on AI-driven biometric analytics and data platforms

BIOMEYE S.r.l. Milano,
Italy

- Defined product and technology strategy for an AI-driven biometric analytics platform aligned with business objectives and market positioning
- Led the design and rollout of AI-based processing systems and scalable data pipelines
- Built and coordinated cross-functional engineering activities across platform, data and AI domains
- Drove the transition toward AI-driven and data-centric architectures, improving platform scalability and decision support

Firmware Development Manager | Technical Lead

01/2022 – 10/2022

- Led firmware engineering team, owning architecture, delivery and technical direction
- Designed and delivered embedded solutions for industrial systems

AESYS S.p.A.
Bergamo, Italy

- Coordinated cross-functional development activities in complex environments

Software Development Manager

06/2021 – 12/2021
ASG s.r.l. Milano, Italy

- Led software engineering team delivering industrial IoT cloud platforms
- Designed scalable architectures and system integrations
- Drove the evolution of the platform toward cloud-native and data-driven architectures

Technical Project Manager | Research Lead

01/2020 – 07/2020
L.I.F.E. Italia s.r.l.
Milano, Italy

- Led cross-functional teams across hardware and software domains in biomedical and autonomous systems projects
- Directed development of connected and autonomous vehicle solutions and advanced electronic systems
- Coordinated research and development activities across engineering domains

Technical Team Lead | Software Development

07/2019 – 01/2020
Ubiquicom s.r.l.
Milano, Italy

- Led cross-functional teams delivering SaaS-based electronic tracking solutions across logistics, IoT and Industry 4.0 environments
- Coordinated development of embedded and distributed systems for IoT, tracking and connected platforms
- Delivered mission-critical solutions in complex industrial environments with real-time data processing requirements
- Delivered solutions supporting large-scale logistics and industrial operations

Engineering Team Lead | Motorsport Electronics & IoT Systems

06/2015 – 05/2019
EMM Motorsport Ltd,
UK (Ecodat, IT)

- Led the development of advanced electrical and electronic systems for the automotive motorsport sector.
- Delivered mission-critical race control IoT platforms, radio communication systems, and telemetry components deployed across top-tier international single-seater championships (Formula 1, F2, F3, DTM)
- Spearheaded development of FIA-homologated systems, ensuring real-time data processing, ultra-high reliability, and compliance with stringent safety-critical requirements

Software Development Specialist

09/2012 – 05/2015
TEA Sistemi S.p.A. ,
Milano , Italy

- Developed software solutions for industrial automation, Oil & Gas R&D and UAV-based environmental monitoring systems
- Designed and implemented distributed and embedded systems, including real-time platforms and PLC-based industrial systems
- Delivered software components for offshore platform systems and factory R&D environments, supporting monitoring, control and real-time data processing
- Developed simulation software platforms for offshore systems (Nova Scotia, Canada), enabling testing and validation of operational scenarios
- Designed, developed and deployed autonomous drone systems for environmental monitoring and data acquisition

Embedded Systems & Automation Lead

01/2007 – 08/2012
ENNASoft , Italy

- Founded and led an independent venture delivering industrial automation software and real-time systems
- Developed software solutions for industrial and building automation, improving operational efficiency and reducing energy costs
- Designed and delivered custom embedded systems tailored to client needs, enhancing performance and system reliability

- Provided software development and consulting services, enabling organizations to leverage technology and improve productivity

Software Developer

- Developed modules for logistics platforms (GLS, Italy), supporting shipment tracking and operational processes

2005 – 2005
Netfarm s.r.l. Pisa,
Italy

EDUCATION

Bachelor's Degree in Computer Science

University of Pisa
110/110 with honors (cum laude)

2001 – 2005
Pisa, Italy

PUBLICATIONS

Increasing decoupling in a framework for programming robots Principles and Practice of Software Development in Robotics (SDIR2005), ICRA workshop, Barcelona

IEE Proceedings Software, Vol 152, No. 5, pp. 215-222

Cisternino, A., Colombo, D., Ennas, G., Ambriola, V.

Robotics4.NET: Software body for controlling robots IEE Proceedings Software, Vol 152, No. 5, pp. 215-222, October 2005

SELECTED RECOGNITION, EXECUTIVE EDUCATION & PROGRAMS

- America Innovation Award — Winner, 2024
- Open Innovation Program — Le Village by CA Triveneto (Crédit Agricole), 2025
- Executive Education in Business Internationalization & Change Management — "Go.In" Program, University of Bergamo / CYFE , 2023
- Business Programs — ComoNExT Digital Innovation Hub, Silver Economy (Intesa Sanpaolo), ARTER Bologna , 2023-2025
- Startup Program — DPIXEL / Fabrick (Sella Group) , 2022
- Designing Public Outcomes — Copenhagen Institute of Interaction Design (CIID), 2023
- Industrial Automation Training — Panasonic PLC Programming (FPWINPRO), Basic & Intermediate , 2013
- Lead Developer, A.F.T.E.R.GUARD. Project — University of Pisa in partnership with Microsoft Research Cambridge, 2005
- STICC Exchange Program — Carnegie Mellon University, coursework in Machine Learning, Robotic Manipulation and Robotic Perception, 2004
- Microsoft Imagine Cup — Italian Finals, 2nd Place, 2004
